User journey

by the Design Team of Accenture Interactive NL

People 2–9

Time 30 min

Difficulty Beginner

Creating a user journey is a quick way to help you and your team gain a deeper understanding of who you're designing for, aka the stakeholder in your project. The information you add here should be representative of the observations and research you've done about your users.

1 Phases High-level steps your user needs to accomplish from start to finish	MOTIVATION	INFORMATION GATHERING	ANALYZES OF VARIOUS PRODUCTS	CHOOSES THE MOST EFFICIENT PRODUCT	Payment
2 Actions Detailed actions your user has to perform	Wants to reduce the fear about road safety. Taking action and be Prepared for roadsafety	Selecting an efficient product in order to improve road safety	Other products are available including static boards	Smart dynamic boards are more efficient than static boards	Afterwards the product satisfaction.
3 Feelings What your user might be thinking and feeling at the moment					
4 Touch Points Problems your user runs into	Buyers are euphoric	We have to collect the data base. The government need not worry about traffic safety after the installation.	Many varieties of Products are accessible and it maintains user	The government will now no longer be worried about the protection after receiving this	The government acquires the product after determining its worth
5 Opportunities Potential improvements or enhancements to the experience	The customers are benefited from increased road safety	The customer is aware of the product's manufacturing process	The customer will be conscious of other products	The buyer comes to know which product is best one	The customer will love the journey
